Page 20, Line 2: INSERT NEW PARAGRAPH:

"The Commission is concerned about costs associated with the outage and capacity turn-down of Palo Verde Nuclear Generating Station Unit 1 that began on December 29, 2005 and continues today and believes that, like the costs associated with the summer 2005 outages at PVNGS, all fuel and purchase power expenses related to the latest Unit One outages and turndown should be segregated out from the adjustor mechanism and subjected to the prudence review being conducted by Staff's consultant. As of January 21, 2005 APS had estimated these costs to be between \$7 million and \$10 million."

Page 25, Line 10: INSERT NEW ORDERING PARAGRAPH:

"IT IS FURTHER ORDERED THAT all fuel and purchase power costs associated with the PVNGS outage and capacity turn-down that began on December 29, 2005 shall be segregated out from the adjustor mechanism and subject to the prudence review being conducted by Staff's consultant."

Make all conforming changes.
